The Daily Press.

HONGKONG, JANUARY 31st, 1912.

The death of one so near to the Throne as His Grace the DUKE OF FIFE, husband of the Princess Royal, and brother-in-law of His Majesty the King will necessarily cause the cancellation of many of the arrangements which were being made in London for popular rejoicings in connection with the return of Their Majesties the King and Queen from their memorable and epoch-making visit to India. The Duke and his family were passing the winter in Egypt—not for the first time—for the benefit of the health of the PRINCESS ROYAL, which has for some time been far from robust. It was only on Monday night that news came of the grave illness of the DUKE, and this telegram was followed within the short space of thirty hours by another intimating that His Grace had passed peacefully away at Assuan in Upper Egypt, on the bank of the Nile. The nature of his illness was pleurisy and congestion of the lungs, due to a chill, and this will doubtless be associated in the minds of most readers with the unpleasant experiences of the Duke and his family on the occasion of the wreck of the Delhi. When the boat conveying the Royal party from the wreck filled and sank, the occupants had to struggle through the breakers to the shore, and drenched, cold, and clothed only in night attire and coats, they had to trudge

over four miles of rocky shore to the lighthouse, before they were able to obtain such garments as were to be found in an African lighthouse. Although the reports at the time gave the impression that all the members of the Royal party were none the worse for their unpleasant experiences, nothing was particularly mentioned of the Duke beyond that he had stood the fatigue well. His Grace was 63 years of age. His elevation to the Dukedom took place upon his marriage to Princess Louise, the eldest daughter of the late King EDWARD and Queen ALEXANDRA. At the age of 23, as the Earl of Fife, he embarked on a Parliamentary career and sat in the House of Commons as M.P. for Moray and Nairn, in the Liberal interest. On ceasing to represent the constituency he became Captain and Gold Stick of the Corps of Gentlemen at Arms, and held that appointment for five years. During that period he went on a special mission to the King of Saxony, and this is all His Grace's record contains of his participation in State Affairs, excepting that he was Lord High Constable at the Coronations of King EDWARD VII and King GEORGE V. His Grace was one of the founders and for nine years Vice-President of the Chartered Company of South Africa, which position he resigned after the JAMESON Raid. He was also at one time partner in the metropolitan banking firm of Sir SAMUEL SOOY & Co., but since his marriage he has been chiefly interested in his family estates which aggregate upwards of a quarter of a million acres. His Grace, however, has for some years past been the Lord Lieutenant and Custos Rotulorum of the County of London, and is the President of the County of London Territorial Association, as well as honorary Colonel of the Banffshire Artillery Volunteers. His death at Assuan will not only cast a gloom over Court circles but over all who have been within the sphere of His Grace's activities as a landowner, patriot or a philanthropist. The griefs of the Throne are the griefs of the Empire and throughout the British dominions the deepest sympathy will be expressed with the Princess Royal in her bereavement.

Seoul now possesses a large skating rink!

The books for the Hongkong Race Meeting are now issued and advertised for sale by Messrs. Noronha & Co. The list shows 41 stables, with 87 ponies.

At the Magistracy yesterday an unemployed carpenter was convicted of having had 48 taels of loose opium in his possession and was fined \$500 or three months' imprisonment.

Mr. and Mrs. R. E. Bellios are at present in India, and are shortly revisiting Hongkong. We notice that Mr. Bellios recently presided at the annual distribution of prizes at the Jewish Free School in Calcutta, and that Mrs. Bellios gave the prizes away.

A skating carnival will be held in the Victoria Park to-morrow night. A number of competitions will be held, and an additional attraction will be the presence of the band of the 8th Rajputs, who will render selections. The carnival will commence at 9 p.m.

A Chinese play, *Turandot*, will probably be staged shortly at the St. James' Theatre, London. Sir George Alexander was present at the first performance of *Turandot* at the Deutsche Theatre, Berlin, a short time ago, and immediately made arrangements with Dr. Reinhardt, the producer, for the English rights.

There were 40 cases of small-pox reported in the Colony last week. Twenty-eight cases proved fatal. Of the 40 cases, 19 were Chinese the other being a Portuguese case. This epidemic may be regarded as one of the penalties the Colony suffers from the great influx of Chinese from the mainland, for small-pox appears to have been more prevalent in the Colony this season than it has been for years.

Instances of dumping are daily being recorded. On Monday the dead body of a Chinese male aged about 30 was found in the breakwater at Causeway Bay, death apparently being due to natural causes. The body of a girl about three years old, who had evidently died from small-pox, was found on a buoy in the Central Fairway. The third case was that of a man who was found in the hold of the s.s. *Hop Sang* after the vessel left Canton, death in this case being due to shock.

The current number of *Truth* says: "Service in the capacity of an assistant engineer or overseer in the Public Works Department of the Colony of Hongkong appears to be curiously unattractive, judging from a list I have received of men who have either retired before the termination of their engagements or else refused to stay on for another term. The list mentions a dozen or so cases in which this has happened during the last few years. Needless to say, frequent changes in the staff cannot be to the advantage of the department, and it would be interesting to learn the reason for these resignations."

CANTON.

(FROM OUR OWN CORRESPONDENT.)

CANTON, January 28th.

THE KAISER'S BIRTHDAY CELEBRATION.

Yesterday was the German Emperor's birthday and on Shamcen the event was celebrated in gay fashion. In the morning there was a reception in the German Consulate and on board the S.M.S. *Tsingtau* and in the afternoon sports were held on the recreation ground. The weather was grand and there was a big crowd, the soldiers and sailors being present in large numbers and giving colour to the show. A very interesting programme was gone through and produced some fine races. The final of the 100 yards was a great race, Pte. Nettleship of the K.O.Y.L.I. and J. W. Shaeffer of the *Wilmington* running neck and neck all the way and breaking the tape almost together. The verdict went to the American, but it was a very close thing. The team race was a walk-over for the K.O.Y.L.I. team, the next team finishing about 200 yards behind. W. E. Cutler won the Hurdle race and P. Arnot the Sack race, while Shaeffer easily beat the field at putting the shot. The tug-of-war was as usual the tit-bit of the afternoon and the cause of great excitement. The ground was all against the men getting a good footing and pure weight was what told, the American team, which was easily the heaviest, winning rather easily. In the evening there was a Concert and Dance in the Club Theatre, which was beautifully decorated with flags, and a very pleasant evening was spent.

A VILLAGE PILLAGED.

A village named Shing Wong in the district of Hoi Shan was plundered by a mob of robbers under a chief named Lam. These robbers had taken up their residence in a neighbouring village called Cha Shan and were looked upon as friendly and nothing was suspected. They fell upon the first named place, however, with fire and sword and plundered all they could lay their hands on. There was not a great deal of booty to be got, and it is presumed that they were flying after bigger game, but were disappointed and just took what first came to their hand, which happened to be this unsuspecting little village beside them. Troops have been sent from San Wui to capture them if possible.

MORE TROOPS FOR NANKING.

More troops are being despatched from Canton for the North, and the *Kwangsees*, which is at present in the river, is taking up about a thousand more soldiers.

MR. MATHESON LANG AND MISS HUTIN BRITTON.

A notable event in the history of the Eastern stage is the forthcoming visit to Hongkong of Mr. Matheson Lang and Miss Hutin Britton, supported by a large and carefully chosen company, with productions complete in every detail as presented in the West End of London. The opening performance will be devoted to a presentation of Shakespeare's delightful comedy, "The Taming of the Shrew." Mr. Lang's Petruchio ranks amongst the greatest of his successes, while the Catherine of Miss Hutin Britton is one of her highest conceptions, and supported as they are by a powerful cast, an interesting treat is promised. On Saturday, February 3, will be presented "Bardely's the Magnificent," the work of those masters of romance, Henry Hamilton and Rafael Sabatini. The story of a strange love quest of the "Marquis de Bardely's," known as the "Magnificent," is full of wild adventure, stirring episodes and tender love scenes, and showing sumptuous pictures of the days when Louis XIII. was King. On Monday, February 5, "Hamlet" will be produced. This was the triumph of Mr. Lang's career at the Lyceum Theatre, London, when produced on March 18, 1908, and also proved the triumph of his South African tour. The greatest of all tragedies has an appeal to every class of the community, unequalled by any other play. During the long run at the Lyceum Theatre, London, the performance was witnessed by 32,000 people weekly. The entire production has been brought from London and will be produced in Hongkong in every detail as at the Lyceum Theatre. Messrs. Lang and Holloway were determined that the scale of productions and the artistic plane of the acting should exceed anything ever before attempted, so they will place before the local playgoers performances perfect in detail and elaboration of mounting associated only with the greatest London theatres. We may mention that the advance booking at Moutrie's has broken all records.

MAKE A KNOT IN YOUR HANDKERCHIEF.

to remind you to buy PINKLETS, the little pink handkerchiefs, they dispel Constipation, regulate the Liver, aid Digestion, cure Biliousness. As gentle as nature. 60 cents a tube, of Chemists, or The Dr. Williams' Medicine Co., 84, Szechuen Road, Shanghai.

SUPREME COURT.

Tuesday, 30th January.

IN SUMMARY JURISDICTION.

BEFORE MR. H. H. J. GOMPERTZ
(PUNISH JUDGE).

CONTRACTOR SUE.

The Macao Electric Lighting Co. sued Ng Tsun Kee, contractor, for \$1,000, and there was a counter claim for \$774. The action related to the removal of a quantity of timber and cable from Junk Bay to Macao. Plaintiffs claimed for the delivery or return of the timber, while defendant claimed for work done in respect of the removal of the timber from Junk Bay to Hongkong harbour.

Mr. W. Lewis appeared for the plaintiffs and Mr. F. N. D'Almeida e Castro for the defendant.

After preliminary argument, Mr. Lewis stated that the company was registered in Hongkong, while the contractor carried on business in Kowloon. On the 8th April last, the company entered into a contract with the Quong Hip Loong Co. to transport from Junk Bay to Macao a quantity of machinery. The Quong Hip Loong Co. had a sub-contractor with the contractor who appeared in the present case. The machinery was not involved. The contractor of the company asked the defendant to take over to Macao, with the machinery, a quantity of timber and a length of cable. The sub-contractor agreed to take the material across, the price agreed upon being \$70. Then the Quong Hip Loong Co. went into liquidation, and as no official liquidator was appointed, the Electric Lighting Co. was unable to pay them any money. The Quong Hip Loong Co. was therefore unable to pay their sub-contractor. The result was that the machinery remained in Hongkong for about nine months. An official liquidator was then appointed and he took the machinery to Macao himself.

His Lordship—You paid the liquidator? Mr. Lewis—Yes, but we paid him less than the contract price. The sub-contractor has been urged on several occasions to take the timber to Macao, but he has not done so. My friend's cross-action is for \$774, merely for taking that timber from Junk Bay to Hongkong harbour, where it now lies.

After evidence and lengthy argument by Counsel, His Lordship reserved judgment.

PIRACY AT PINGHOL.

Yesterday morning a Hongkong junk reached Shaikwan and reported having encountered pirates on Sunday at noon at Pinghol who not only robbed them of their cargo of fish but stripped them of their clothing.

It appears that about noon the junk was approached by about twenty junks, and as the fishermen realised that their intentions were hostile they attempted to get out of reach. This, however, was impossible, as there was no wind, and a couple of shots fired across their bows made them stop. The hostile junks surrounded them, and about 80 or 100 men appeared, some of whom threw stink pots into the fishing junk. These burned very severely the master of the fishing junk, his wife, and several members of the crew. Then the pirates boarded the junk, removed the cargo of fish worth about \$400, took everything on board of any value and also stripped the unfortunate people of their clothing. The pirates crew sought the shelter of the customs station at Sa Mun, but little could be done for them there. However, they were joined by their companion junk, the crew of which gave them some clothing.

When the junk put into Shaikwan yesterday morning the unfortunate people were starving and had to be supplied with food, while Inspector Gourlay attended to their injuries and sent them to the hospital. This is the fourth piracy which has taken place in that neighbourhood during the past fortnight, and it would seem as if the place should receive some attention from the naval authorities.

SHORT CUT ROUND THE WORLD.

PANAMA CANAL TO SAVE THOUSANDS OF MILES.

Thousands of miles will be saved to shipping by the opening of the Panama Canal in June next year. The *Times*, the organ of the Hamlyn shippingowners, publishes the following statistics to show how great will be the saving that will be made:

	Present distance Miles in sea miles.	Saved.
Europe to San Francisco	13,621	6,900
Montreal to Sydney	13,690	2,738
Europe to Valparaiso	8,938	2,100
England to Australia	7,307	800
England to New Zealand	12,725	1,600

The saving in the voyage between New York and Shanghai will be 1,400 miles, and between New York and Australia and New Zealand 2,300 miles.

The probable change in navigation routes will create equally great changes in the distribution of the canal trade, for which English firms already are making preparation. It is stated that English firms are making arrangements to open coaling stations at Nukulofa, the capital of the Friendly Islands and on Pitcairn Island.

The troops engaged in the Abor Expedition were delighted by the receipt of a telegram from the King, conveying His Majesty's hearty wishes for Christmas and the New Year, and looking to a successful and speedy termination of the operations.

TELEGRAMS. TELEGRAMS.

[THROUGH REUTER'S AGENCY.]

THE REVOLUTION.

IMPERIALISTS DEFEATED IN BATTLE.

Reuter's correspondent at Peking cables that the Imperialists are reported to have been defeated in battle by the Revolutionary Army along the Tientsin-Pokow Railway, both sides losing heavily.

There is a reign of terror at Mukden owing to numerous murders (of or by) revolutionaries.

REVOLUTIONARY OUTBREAK IN EQUADOR.

London, January 30th.
A revolutionary outbreak in Ecuador has been crushed after a sanguinary battle.

A mob at Guayaquil lynched the rebel commander, shooting, beheading and burning him.

Five revolutionary generals were subsequently sent to Quito to be imprisoned, but the mob attacked the guards, and though several were killed by volleys, the walls of the goal were breached, and the generals were dragged out and killed. Their bodies were dragged through the streets to the cemetery where they were buried.

COLONIAL RECIPROCITY.

London, January 30th.
Reuter's correspondent at Melbourne states that the Commonwealth has not yet received the Canadian reciprocity proposals, but the Hon. A. Fisher suggests that the visit of Mr. Foster on the 16th inst., who was heartily welcomed in Australia, will greatly facilitate the negotiations.

BOMBS AT LISBON.

London, January 30th.
An explosion of dynamite bombs occurred in Lisbon yesterday morning in a house where the manufacture of bombs is supposed to have been carried on.

HAVANA'S SUGAR CROP.

London, January 30th.
Reuter's correspondent at Havana reports that the continuance of very warm weather is unfavourably affecting the sugar crop. The cane contains on an average 10 per cent. less sugar than last year and it is feared that the estimate of 18½ million tons will be greatly in excess of the actual yield.

WELCOMING THEIR MAJESTIES.

London, January 30th.
Reuter's correspondent at Gibraltar states that a special Moorish mission sent by the Sultan, including the Grand Vizier and the Foreign Minister, has arrived to greet King George and Queen Mary.

OBITUARY.

London, January 30th.
The death is announced of Admiral Sir John Dalrymple Hay, who saw service in China in the early forties, and who retired from the Royal Navy in 1878.

AUSTRALIAN CRICKET.

London, January 30th.
Reuter's correspondent at Sydney wires that in the interstate cricket match between New South Wales and Victoria the former made 448 in the first innings, to which Roy Minnet contributed 216 and carried out his bat, and 50 in the second innings for three wickets. Victoria replied with 129 in the first innings, Armstrong being responsible for 51, and 366 in the second innings. McKenzie scoring 121 and Armstrong 60 unfinished.

A NEW BARONET.

London, January 30th.
Mr. John Henniker-Heaton, whose name is associated with so many postal reforms, and who has four times declined to accept a K.C.M.G., has been made a baronet.

LABOUR UNREST IN PORTUGAL.

London, January 30th.
Reuter's correspondent at Lisbon telegraphs that a strike of farm labourers in the district of Evora, the details of which are obscure, but it was apparently suppressed by the military, has led to a great sympathetic strike of all trades in the same province and a general strike in Lisbon. In the capital the cars are already stopped, and despite extensive military measures the lighting and other public services are threatened.

[THROUGH REUTER'S AGENCY.]

DEATH OF THE DUKE OF FIFE.

London, January 30th.
Reuter's correspondent at Cairo telegraphs that the Duke of Fife passed a restless night and the bulletin states that his condition causes grave anxiety.

The Duke of Fife died peacefully at 6 p.m.

All the newspapers in their articles on the death of the Duke of Fife express sympathy with the Princess Royal and Their Majesties, whose joyous homecoming is shadowed. They pay a tribute to the character of the Duke of Fife as an enlightened landlord and a staunch Imperialist.

It is expected that the arrangements to welcome Their Majesties at Portsmouth and London will be modified.

MR. CHURCHILL'S VISIT TO BELFAST.

London, January 30th.
Mr. Churchill's letter emphasises the point that he had nothing to do with the selection of the Ulster Hall, which was taken by the Belfast Liberals after other proposals had failed. He was not connected with any of the arrangements: he had merely consented to fulfil an old promise to address the Ulster Liberals. Therefore the Ulster Council was seeking to fasten a quarrel on grounds of offence where none was intended. As regards public order, he invited no assurance from Lord Londonderry. He relied upon the law and the sense of justice of the citizens of Belfast.

The Duke of Abercorn, in writing to the Ulster Council of Ulster, said that he was in full accord with the decision regarding the visit of Mr. Churchill, and hopes that their efforts will not be relaxed till after the 8th of February. The trick attempted on the Unionists had signally failed.

It is officially announced that the Churchill demonstration will be held on the afternoon of the 8th February on the foot ball ground of the Belfast Celtic Club, which is in the centre of the Nationalist quarter.

The football ground has been chosen for Mr. Churchill's meetings as the Belfast Liberals have been refused the use of six halls.

A marquee will be erected to accommodate 5,000. There will be a procession of 30,000 headed by 400 torchbearers and 15 bands.

This choice of locality is regarded as easing the situation, but the authorities of Belfast have requisitioned troops in case of emergency.

FRANCE AND ITALY.

London, January 30th.
Reuter's correspondent at Rome telegraphs that with a view to preventing a recurrence of the seizure of vessels the appointment of a Franco-Italian Commission is being considered which would establish a *modus vivendi*.

ITALY AND TURKEY.

London, January 30th.
Reuter's correspondent at Hodeidah states that the Italian cruiser *Piadonah* has seized a motor launch belonging to Thorneycroft's flying the Union Jack.

"BELLEPHON" REFLOATED.

London, January 30th.
The Holt liner *Bellephon*, which grounded in the Mersey, has been floated, apparently undamaged.

AN "ENDLESS RAIL."

INVENTION OF A JAPANESE.
Mr. Umeji Takamatsu, of Shimomura, Toyama prefecture, is credited by a vernacular paper, says the *Japan Times*, with an invention that is unique and highly useful in its practicability can be proved. It is in the shape of a tire-cover, so to say, for vehicles. The inventor calls it the "endless rail" from the fact that it furnishes temporary rails for the wheels to pass on. He claims the invention to be the fruit of twelve years of incessant labour and perseverance. To give some details of the "endless rail," they consist of belts formed of pieces of wrought iron, about three inches in width and concave, connected in the manner of the chains of bicycles. These belts fit over and revolve with the wheels, thus furnishing a sort of rail for the wheels to run on with ease and security on muddy or rough paths, just as though they were rolling on ordinary rails.

SANITARY BOARD.

Those present at the fortnightly meeting of the Sanitary Board yesterday were the President, (Mr. E. C. Wolfe), Col. Irwin, Hon. Mr. W. Chatham, Mr. F. B. L. Bowley, Hon. Mr. E. R. Hallifax, Mr. Ian Chu Pak, Dr. Fitzwilliams, Mr. Ng Hon, Tes, Dr. F. Clark, Medical Officer for Health, and Dr. Pearce, Assistant M. O. H.

CONGRATULATIONS.

Prior to the consideration of the ordinary business.

The President said:—There are three matters which I would like to deal with. I regret that there are two members absent. I am sure that all the members will join with me in congratulating Mr. Hewett on receiving the C.M.G. It hardly needs any words of mine to show how much we, as members of the Board, appreciate the services Mr. Hewett has rendered to this Board. When we take into consideration the many other public services he renders, and the large number of prominent public interests which he safeguards, I think we can feel very proud that Mr. Hewett still graces the Board with his presence. The other two matters deal with the appointment of the new members. I think you will all join with me in extending a welcome to the new member, Mr. Bowley. He has for some years past advised this Board, and he has now come to give us his advice more fully than in the past. Then his advice was confined to legal matters, but now I think it will not be confined to any particular subject, but to matters in general. I congratulate Dr. Fitzwilliams on his election as second elective member of this Board. I had heard rumors that he was not going to stand again, but I am glad to say that the doctor, if he ever thought of retiring from the Board, reconsidered his decision.

MISCELLANEOUS.

The President said that he had instructed the Secretary to issue circulars in connection with the appointment of the select committees.

ABERDEEN MARKET.

Some discussion took place in connection with a minute by the President relative to the proposed Aberdeen Market limits.

On the motion of Mr. Bowley, seconded by Mr. Lau Chu Pak, it was decided to refer the question to the Crown Law officers, to ascertain if the proposed conditions could be enforced immediately.

POKFULAM WATER SUPPLY.

At the suggestion of Dr. Fitzwilliams, consideration of the report on the Pokfulam Water Supply was deferred for a fortnight.

CHINESE RUNS AMOK.

The village of Nga In Tan, near Kowloon City, was thrown into the greatest alarm on Monday morning when an elderly man who was supposed to be not quite right in his mind, suddenly ran amok with a loaded revolver and killed one man, and wounded five others before he turned the weapon upon himself and ended his life. The first intimation of the man's homicidal frenzy was manifested in the early hours when he rushed out of his home and seizing an old man by the beard declared that he was the man he was looking for. He discharged his revolver at his victim's face, but the bullet struck somewhere in the cheek and the man fled. He chased one or two others into their houses, and as already stated, killed one man and wounded five others before he committed suicide.

FIGHTING AT SHEKUNG.

Shekung, the most important town on the railway line between Kowloon and Canton, and regarded as the half-way station, has been disturbed during Saturday, Sunday and Monday by serious fighting. Altogether over 30 men have been killed, and the methods employed do not in all cases commend themselves to well-wishers of the Republic Government, as looting of an extensive and most unfair nature has been practised, and if one can believe good evidence sometimes there have been hauled before the Court Martial citizens who were well-known to be desirous of nothing save to live peaceably.

Yesterday (Monday) afternoon a pawnshop was broken into by the soldiers and burned, and loot, it is said, to the value of \$100,000 was taken. The cause of all the fighting is a fairly common one in country districts at the present time. On the declaration of the Republic some weeks ago, an ex-robber leader, Leung, assumed the position of chief magistrate in Shekung, and used his office to make extravagant demands on the merchants, requiring them to pay up \$5000 monthly for the soldiery. They demurred and took their complaint to Canton. Canton thereupon appointed one Wong, a rebel leader of 10,000 soldiers, who about 18 months ago successfully resisted the then Victory troops in Kwangsi. In order to take over the office Wong found it necessary to root out Leung's following. He gained a decided victory on Monday, his troops court-martialed and shot six residents.

In the country districts generally, on the delta, there seems to be great discontent among the general populace, the conditions under the new government being as yet worse than under the old. It is hoped an improvement will soon set in.

THE PRESERVATION OF CHINA'S PALACE TREASURES.

Mr. Tse Tsan Tai, of Hongkong, who has actively interested himself in the preservation of ancient monuments in China, yesterday sent the following telegram to President Sun Yat Sen:—

Hongkong, 30th January, 1912.

President Sun Yat Sen,

Nanking, China.

Prevent the auction sale of ancient Chinese treasures and pictures of the Peking and Fengtien palaces which are of the greatest historical value and importance to China.

Tse Tsan Tai.

COMPANY MEETING.

UNION WATER BOAT CO.

The seventh annual meeting of shareholders in the above company was held yesterday at noon, at the offices of the General Managers, Messrs. Dodwell & Co. Mr. G. H. Medhurst presided, and there were also present:—Messrs. F. J. Bisschop, J. W. C. Bonnar, C. A. Tams, and A. H. Skelton (consulting committee), A. Ritchie, C. R. Edwards, S. R. Corlie, T. G. Weill and Mr. A. Ellis (secretary).

The Secretary having read the notice convening the meeting.

The Chairman said:—Gentlemen,—The report and accounts having been circulated, I propose, with your permission, taking them as read. By exercising strict economy, compatible with keeping up the efficiency of the company's fleet, we have been able to show a profit for the year ended 31st December last of \$1,109,650, which I trust you will consider satisfactory. Beyond referring to the report of the auditor regarding the balance sheet, which reads as follows:—

"I report that I have audited the above balance sheet with the books and vouchers of the company in Hongkong and that in my opinion such balance sheet is properly drawn up so as to exhibit a true and correct view of the state of the company's affairs at the 31st December, 1911, according to the best of my information and the explanations given, and as shown by the books of the company. I have obtained all the information and explanations I have required," the accounts, I think, call for no special comment, but, before proposing the adoption of the report and accounts, I shall be pleased to answer, to the best of my ability, any questions shareholders may wish to ask.

There being no questions,

The Chairman proposed the adoption of the report, which was seconded by Mr. Toms, and agreed to.

On the motion of Mr. Carlisle, seconded by Mr. Weill, Mr. A. O'D. Gourdin was re-elected auditor at a remuneration of \$100 per annum.

THE KOWLOON LAND AND BUILDING COMPANY, LIMITED.

The twenty-third report of the board of directors reads as follows:—

Gentlemen,—The Directors now submit to you a statement of the affairs of the Company, and Balance Sheet for the Year ending 31st December, 1911.

The Balance of Profit and Loss Account for the Year, including \$978,233 balance brought forward from last account, after writing off all charges and expenses, amounts to \$1,751,502. The Directors recommend that a Dividend of \$2.75 per share be paid, which, after writing off the Directors and Auditor's Fees, will leave a balance of \$465,022 to be carried forward to the credit of a new Profit and Loss Account.

Messrs. T. F. Hough and A. Rodger retire by rotation, but offer themselves for re-election.

The Accounts have been audited by Mr. R. C. Edwards, who now retires, but offers himself for re-election.

T. F. HOUGH, Chairman.

Hongkong, 20th January, 1912.

BALANCE SHEET.	
31st December, 1911.	
Paid-up Capital	\$180,000.00
Reserves	274.28
Dividends Outstanding	261.30
Balance of Profit and Loss A/c	1,751,502.00
	\$190,056.60

Assets.	
Cost of Property	\$183,752.95
Cash	11,238.25
Accounts Receivable	3,059.40
	\$198,050.60

PROFIT AND LOSS ACCOUNT.	
To Charges	\$ 333.30
To Repairs	2,002.74
To Fire Insurance	627.50
To Crown Rent	786.00
To Commission to Agents	1,320.00
To Balance to be appropriated at follows:—	
Directors' Fees	\$ 500.00
Auditor's Fees	50.00
Dividend of \$2.75 per share	16,500.00
To be carried to New Profit & Loss Account	465.02
	\$ 17,515.02

Cr.	
By Undivided Profits 1910	\$ 878.23
By Rent	21,535.14
By Interest	105.19
By Scrap Fees	26.00
	\$ 22,544.56

Dr.	
By Undivided Profits 1910	\$ 878.23
By Rent	21,535.14
By Interest	105.19
By Scrap Fees	26.00
	\$ 22,544.56

T. F. HOUGH, } Directors.
A. RODGER, }

A. SHELTON HOOPER, Secretary to the Hongkong Land Investment & Agency Co., Ltd., Agency for the Kowloon Land & Building Co., Ltd.

I report that I have audited the above Balance Sheet with the Books and Vouchers of the Company in Hongkong and that in my opinion such Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs at the 31st December, 1911, according to the best of my information and the explanations given me, and as shown by the Books of the Company.

I have obtained all the information and explanations I have required.

R. EDWARDS, Auditor.

Hongkong, 20th January, 1912.

DAMAGE TO A SUGAR CARGO.

An important message was, on December 21, received in London from Lisbon to the effect that the British steamer *Dumbona*, bound from Java to the United Kingdom, had put in there with her forehold full and the cargo all under water. The vessel's pumps being unable to keep the water down. The significance of the casualty lies in the fact that the *Dumbona* brings a cargo of sugar which must be worth well over \$200,000. She is a steamer of 3,740 tons, built in 1897, and managed by Messrs. Henderson & McIntosh.

SHIPPING NOTES.

The Anglo-Saxon Petroleum Company's steamer *Romany*, stranded recently on Pulo Senang, but got out of her difficult position without assistance on the rising tide. Divers were sent down to examine the hull of the vessel. No signs of any damage were apparent and the vessel proceeded on her voyage to Europe.

A Bangkok paper has the following paragraph:—We learn that the Norwegian steamer *Pronto*, which had been in the Bangkok-Singapore trade for some time past, chartered by the Chinese firm, Bang Seng Chiang, has been sold to a Vladivostok firm, the purchase price being something like £11,000. She will leave for her new port of registry in March.

Of the ships of the P. & O. Company's N class already under construction the *Nankin*, says the *Shipping Gazette*, is expected to be delivered in the spring, and the *Nesara* soon afterwards. Two additional vessels will shortly be laid down, bringing the total of the Nile class to eight ships, each of 7,000 tons gross register. This type of vessel has been evolved for the special convenience of passengers to and from the Far East who may desire to travel by P. & O. at lower rates of passage money than those obtaining in the mail steamers. The service is a fortnightly one, and the passage between London and Japan is made direct, without transhipment.

The British Consular report on the trade of Trieste for 1910 notes that the Austrian-Lloyd Steamship Company has had one of the most successful years on record. With one or two exceptions (for special reasons), all its lines show an improvement, and on some of them a number of extra departures of steamers had to be arranged. Its vessels carried during the past year 466,739 passengers against 376,951 in 1909, and 1,377,180 tons of cargo against 1,129,047. The company paid a dividend of 64 per cent. against 6 per cent. last year.

A Japanese commercial organ states that when the Panama Canal is opened Japanese steamship companies will run steamers to New York and Brazil. The Nippon Yusen Kaisha is now making preparations for a Yokohama-New York service. It is considered that eleven steamers of from 8,000-10,000 tons will be needed for this service.

The formation of a "Chosen Steamship Company" has been authorised. It will come into existence in April. The head office of the Company will be at Seoul, and Baron Kono, the President of the Nippon Yusen Kaisha, will act as adviser to the Company.

The Japanese Government has decided to start a new monthly service from Kobe to Hongkong, Singapore, Saigon, Java and Sumatra. Three steamers will be used on the new line.

The London and Glasgow Shipbuilding Company, Govan, launched on the 20th ult. the steamer *Indraghiti*, which they have built for the "India" Line, of Liverpool. The vessel, which has been constructed under the supervision of Messrs. G. S. Goodwin & Co., is 430 feet in length, 53 feet 8 inches in breadth, 33 feet 1 inch in depth moulded to upper deck, and of about 5,750 tons gross, and 9,000 tons deadweight. She has been built to the highest class at Lloyd's, is fitted with a double bottom for water ballast, and has all the most modern appliances for handling cargo. Accommodation is provided for a limited number of first class passengers in state rooms amidships on the bridge deck. The vessel is to be fitted with a refrigerating installation for the provisions. The naming ceremony was performed by Mrs. Hugh Neilson, Chaplain, being daughter of Sir Thomas Boydell, Bart., Liverpool. The India Line, whose local agents are Messrs. Jardine, Matheson & Co., trades between New York and the Far East, and the new steamer, we learn, will be employed in this trade.

THE REPUBLICAN GOVERNMENT AND EDUCATION.

The Education Department at Nanking has been put in order. Everything is ready, we read, for the putting in force of the measures drafted which are as follows:—

1. All educational institutions are to be called Yu Yao, and their principals are to be known as Yao Chuan. All primary schools are required to be opened on the 5th of the 3rd month. The higher institutions are to be opened if the locality is able to maintain them financially.
2. Until the definite announcement of a systematic plan later, the school year is to be divided into two terms. The first term is to begin on the 5th of the 3rd month and to end with the beginning of the summer vacation. The second is to begin with the close of the vacation and to end with the 2nd month of the next year.
3. The co-educational system is permitted in primary schools.
4. Schools specially established for girls are to be regulated according to the old rules.
5. All text-books must advocate republicanism. Text-books published by the Board of Education of the Manchou government are not allowed to be used.
6. All text-books published by the people must be so altered as to avoid anything written in honour of a Manchou government, or anything about the governmental systems of the Manchous.
7. The students in the primary schools are no longer required to study classics.
8. Teaching of manual training is to be emphasized.
9. Military drill is to be emphasized in the higher institutions.
10. The study of abacus-counting is to be required for the students of the 3rd year in the primary schools.
11. In the middle schools the students are to secure some general knowledge. No special courses of literature and science are to be formed.
12. The courses in the middle school and the elementary normal schools are to extend over a period of four years. An exception is made with regard to those students in such institutions who have studied for more than one year.
13. No official encouragement will be granted to the graduates of the various schools as under the old régime. All graduates are to be known simply as Pih Nih-sun.

INDUSTRIAL DEVELOPMENT OF THE SUDAN.

Recent reports on the Sudan show that the year 1910 marked an epoch of progress along every important line of national development. Fertile agricultural lands were opened up by extensions of railways, large crops of cereals were harvested and marketed, and considerable stimulus was given to the culture of cotton. An important feature of the year's development was the further progress of the railway south of Khartoum. In the first quarter of 1910 the Blue Nile Bridge linking Khartoum north with Khartoum proper was opened, and the end of the year saw the completion of the bridge across the White Nile at Rabak and the extension of the line from Sennar across the Gezira to Kosti, a rapidly growing town on the west bank of the White Nile. Thence the line will be pushed on toward El Obeid, which will probably be reached early in 1912. The commercial and strategic importance of this improvement in communication is already apparent and the building of the line, which links up the rich Gezira province with Khartoum and Port Sudan and thus with the outside world has already been financially justified.

IRRIGATION PROJECTS.

The Sudan Government has made an arrangement with the Sudan Plantations Syndicate by which the latter is to carry out near Wad Medani on behalf of the Government, experimental work in growing cotton and other products. These experiments are to extend over three or four years. On their result will depend the project to construct a dam across the Blue Nile near Sennar and to undertake a scheme for providing water to irrigate some 500,000 acres suitable for growing cotton and cereals, out of the area of several million cultivable acres which the Gezira is supposed to include. Meanwhile the Government continues their investigations on the Blue Nile and the White Nile, and the amount of water which can be allowed for the cultivation of the Sudan without detriment to Egypt will be determined.

SUDAN COTTON.

The possibility that the million square miles of land recently estimated as the extent of Sudan territory will rival the Mississippi Valley and the Egyptian Delta as a cotton-producing area has attracted the serious attention of cotton growers during the past year. The British Cotton Association in its campaign to develop certain British tropical possessions as cotton-producing sections, attaches much importance to the experimental cotton culture in the Sudan. The quantity of cotton exported in 1910 from the Sudan was the largest on record. In the Tokar district, where most of the Sudan cotton is grown, the crop was estimated at 14,000,000 pounds. High prices were realized, in some cases as high as those for Egyptian A.S.S. There are indications from various districts that the large profits realised are attracting the attention of native cultivators to the growing of higher-grade cotton. The statistics of the Sudan crop of 1910 indicate that 51 per cent. is flood grown and about 40 per cent. rain grown, over 91 per cent. being thus grown by natives unassisted by European enterprise. Cotton growing may therefore be regarded as a native industry, and it is gratifying to note that the quality as well as the quantity has improved, owing to the introduction by the Government of good Egyptian A.S.S. seed into the Tokar cultivation, while the estates under European management, notably that of the Sudan Plantations Syndicate, of Zaidab, in the Berber Province, have shown that cotton of a standard quite equal to the Mit Affif of Egypt can be produced.

PORT SUDAN.

The rapid growth of Port Sudan, the Red Sea outlet to the Sudan Government railway system, since it was opened to trade only two years ago, has exceeded the most sanguine expectations, and the success and future importance of the place are now considered as beyond question. Quays recently completed are capable of berthing five 5,000-ton steamers, but so rapid has been the increase of the port that as many as eight steamers have sought berths at the same time, and extensions to existing wharves or new quays are already being argued by shippers. There are now eleven shipping lines calling regularly at Port Sudan once a month or more frequently, including the Union Castle, British India, Strick, Ellerman, Clan, Harrison, Hamburg-American, Rubattino, Austrian Lloyd, and Khedivial Mail. Four firms of shipping agents are just completing permanent stone and brick offices and buildings, those of a fifth are half finished and plans for a hotel, which has become a pressing necessity, are being rapidly developed. The railway from Sennar to Port Sudan, opened four years ago, makes possible the delivery of goods from Port Sudan to Khartoum in 12 hours.

FAREWELL TO INDIA.

KING-EMPEROR'S ADDRESS ON LEAVING BOMBAY.

In reply to an address on the eve of his departure from Bombay, His Majesty said:—I thank you sincerely on behalf of the Queen and myself for the kind and generous terms of the address of farewell which you present in name of the people of the Bombay Presidency. The cordial welcome which we received on our arrival in Bombay was a pleasure to us, and the display of warm-hearted loyalty which has characterized every stage of our progress during the past five weeks. And now we have listened with mingled feelings of gratification and sorrow to your touching words of farewell and God-speed. Your hopeful forecasts as to the benefits which India will derive from this visit deepen our thankfulness at having accomplished the earnest wish of our heart. It has given me infinite pleasure to be once more among my faithful subjects in India and the Queen and I have been touched beyond words by the genuine love and devotion towards us which we feel have entered into the spirit of the people.

Our one and only cause of regret during these past happy weeks has been our inability to stay longer in this country and to visit the ancient Presidency of Madras and the States of many chiefs who have offered us their generous hospitality. On leaving the shores of India we carry lasting memories of experiences made pleasant by every aid which thoughtful care and affectionate regard could devise. We fervently trust that our visit may, by God's grace, conduce to the general good of the people of this great continent. Their interests and well-being will always be as near and as dear to me as those of millions of my subjects in other quarters of the globe.

It is a matter of intense satisfaction to me to realize how all classes and creeds have joined together in the true-hearted welcome which has been so uniformly accorded to us. It is not possible that the same unity and concord may for the future govern the daily relations of their private and public life. The attainment of this would indeed be to us a happy outcome of our visit to India. To you, representatives of Bombay, who have greeted us so warmly on our arrival and departure, I deliver this message of loving farewell to our Indian Empire. May the Almighty ever assist and bless and encourage in the earnest endeavour to promote its welfare and to secure to it the blessings of prosperity and peace."

AN INDO-EUROPEAN RAILWAY.

IMPORTANT PROJECT BEGUN.

It is rather curious that coincident with the arrival in India of the King-Emperor one of the most important projects that has ever been conceived for bringing India into closer connection with the heart of the Empire should have taken definite shape, says a writer in the *Birmingham Daily Post*. For more than a generation the construction of a railway from India towards the Mediterranean has been urged, and considerable discussion upon the possibilities of such a line has taken place. Now the Indian Government has definitely decided that the survey for such a line shall be put in hand, and this work will commence early in the New Year.

Two routes for this line naturally present themselves, and in each case Karachi—an important and ever-growing port practically on the boundary between Sind and Baluchistan, on the extreme north-west coast of India—is selected as the natural starting point. By the first route the line would traverse Baluchistan and Southern Persia, there to link up with the much discussed Bagdad railway, and ultimately be continued to the Mediterranean, while the other route would take the line along the coast of the Persian Gulf, through the sterile wastes of Sinai, ultimately arriving at Port Said, the natural entrepot for our Eastern dependency.

After very careful thought, the latter course is the one that has been chosen, and those who have any knowledge of the two alternative routes will agree that a wise choice has been made. It will not take a very long time comparatively speaking, of course—to survey this country, since its configuration and general characteristics are fairly well known, and by the end of 1912 it should be possible for this actual work of building the line to be taken in hand.

There are two distinct points of view to be taken into consideration when the building of this line is examined. One is that of the engineer, who naturally wants to find the easiest country he can and the one that presents the fewest difficulties. The other is that of the military strategist, who sees in the building of a railway that shall bring the heart of India five or six days nearer to the Mother Country, a step forward that will probably revolutionize the whole of our present plans for the defence of the dependency. There is also, of course, the commercial aspect of either alternative to be considered, and the merchant community of India are already asking what benefits they would reap by the adoption of either of the proposed routes.

From each of these standpoints it has to be agreed that the Northern Arabia and Persian Gulf line offers the most advantages, and that the line to link up with the Bagdad Railway may safely be left until some indefinite date in the future. Not only is the proposed route much shorter, but its advantages outweigh everything that can be urged against it. For good or ill we are committed to the policing of the Persian Gulf, and if we propose to put an end to the wholesale gun-running traffic into Baluchistan, Turkistan, and Afghanistan that is going forward at the moment despite the endeavours of our semi-obsolete gun-boats in the Gulf, this—as experience has shown—can only be done by means of a railway that shall enable us to check the trade at its source.

The question of supremacy in the Persian Gulf is now forced to the front owing to Russia's dramatic coup in Persia, and while it is well understood that the Governments of London and St. Petersburg are agreed upon their joint future action, there is Germany to be considered. The Bagdad railway is being steadily pushed forward and an outlet on the Gulf—probably at Koweit—is bound to be demanded sooner or later. Since Great Britain and Russia are engaged at the moment in parcelling out Persia between them and are affording each other mutual support, it seems difficult to find any ground for refusing this demand when it is made. Therefore, a British line to compete with it, and at the same time to provide a rapid and regular means of communication between the Gulf ports and India becomes an urgent necessity. The line would skirt the foothills of the range that separates the coast from the interior of Arabia, where the gun-runners have their lurking places, and would render these more accessible than they are at the moment.

So far attention has only been given to the strategic importance of this line, and to this aspect it will be necessary to return before this article concludes, in order that a true perspective of the importance of this scheme now being undertaken by the Indian Government may be arrived at. It may be as well for a moment, however, to glance at the commercial possibilities of the railway and the ultimate chance that it possesses of paying its way, which it is much to be desired it should do at the earliest possible moment. When there are political purposes to be served by the construction of a railway line, it has long been held in this country that the initial expenses should not delay its commencement. The Uganda Railway is an apt case in point. Other railways have been built, too, for their purely military value, as witness the line that Lord Kitchener laid down to Omdurman.

FIRE ON THE P. AND O. STEAMER "ISIS."

The fire on the P. and O. mail boat *Isis* seems to have been more serious than was at first stated, says a Bombay wire of January 8. Something like twenty mail bags have not been delivered at Bombay, and several of the bags were burnt. It is possible that the missing bags have merely been delayed. All the English mails have been delivered. The mail bag contains on an average something like 2,200 letters, and over 2,700 bags of all mails were received from the *Oceanic*. As has been stated, the total is short by about 27. The English mails were landed first, and the consequence was that the fire did not touch them. Italian mails suffered to the greatest extent, as they were taken on board last of all. The mails from Italy, Germany and America also suffered from fire and water.

THE FAR EAST'S AWAKENING. DEVELOPMENTS WHICH MAY FOLLOW.

[FROM "THE FINANCIER,"]

When we presume, and in so doing we think we are right, that before long the Government of China will be in the hands of really enlightened administrators, we would do well to rid our minds of the idea, so prevalent in practically all European countries, that China is industrially, commercially and even economically impotent. Nothing in point of fact, could be further from the truth. To a very large extent China has been in a state of suspended animation since the country fell under the Manchu thrall some centuries ago. That the hold of these conquerors of a highly civilised and highly cultured people has been weakening for years past has been apparent to even the most casual students of Chinese history, and it must be equally apparent that had the Manchus been destroyers as well as conquerors movements on the part of the Chinese in the direction of greater liberty and of renewed industrial and commercial progress would have been, up to the present at any rate, improbable and, perhaps, impossible. The reputation for ability and endurance in the performance of his allotted tasks which the Chinese worker has earned, both when in the employment of aliens in his own land and when labouring in foreign countries, furnishes us with very reliable evidence that but for some repressive cause on his energies, physical and intellectual, at home the undeserved reputation which has been commonly attached to his civilisation would be non-existent. It may be said that China today is in the position Japan was some 40 years ago. For centuries both countries were governed by a ruling caste, and in both cases popular oppression of the worst form obtained. To assert, however, that Japan, when she Westernised her methods of government and set out upon that industrial and commercial career which has been the wonder of the universe, was an uncivilised country in the generally accepted meaning of the word, is preposterous nonsense. Japan may have received her earliest lessons in arts and crafts from China at a time when Chinese civilisation probably led the world, but these arts and crafts never died during the long period the island kingdom was under the harsh domination of the military caste and clans. The removal of this tyranny plus the adoption of the best of European methods served merely to give an impetus to already existing industries and industrial and commercial aspirations, and the very general acceptance of the new condition of affairs by the erstwhile dominant section of the population accelerated rather than retarded the progress Japan has made during the past 30 to 40 years.

CAN CHINA IMITATE JAPAN?

Whether it will be possible for China to do for herself under a more equitable system of government what Japan has managed to do, and to succeed in achieving a position as potent as that of the island kingdom in as brief a period of time, is naturally an open question, and one, indeed, only China can effectively answer. No one but a Chinaman can say what Chinamen really think of the Manchus, and, given the general acceptance by the Chinese of the proposed new form of government, it yet remains to be seen whether a policy of extermination with regard to the disposed dominant class or one which would lead to the amalgamation of these hitherto conflicting interests will be adopted. But, whether the Manchus are to be absorbed or whether they are to totally disappear as a factor in the life of the country, the fact remains that the Chinese are capable, under adequate and honest government, of developments which, in a now time-worn phrase, might well stagger humanity. Years might possibly elapse before the stigma of the degradation of centuries to which the Chinese have had to submit has been perfectly removed, but, on the other hand, the judicious blending of what is best in European civilisation with the best that remains of Chinese civilisation might work wonders in a marvellously brief period of time. In any case, under such given conditions there is no reason to think that what Japan could do China cannot do, industrially and commercially, and in some directions do even better, for it must be remembered that China, despite admitted backwardness in governmental methods in the past, is not today

the forbidden land to all foreign influences Japan practically was when she set out to work out her national salvation on modern lines. At the same time we must not overlook the fact that the greatness of China's area and the immensity of her population lay the country open to retrograde movements which were naturally non-existent in the case of Japan, and the inevitable lack of homogeneity in aspirations which both her area and her population numbers must entail constitutes a factor against very noticeable and immediate progress that cannot be totally disregarded. The task of governing China under what might be described as modern conditions is one which calls for statesmanship of a very high order. Whether among the men who have come to the front in the recent movement such ability is to be found we cannot say, and whether the proposed form of government, namely, Republicanism, will satisfy the generality of the people to be thus ruled is yet another moot point. Unless there is the possibility of a widespread yet sane appreciation of the benefits which the new system of administration should bring, and unless these benefits are very real, the populace at large may look upon the change as one of a King's Log and a King's Log order, and clamour—perhaps not stop short at clamouring—for a reversal to the old state of affairs.

FAR EAST DEVELOPMENTS AND BRITISH TRADE.
Eliminating from consideration, however, what might be called hinterland possibilities, that portion of China which would be at once subject to the influences of a benign yet progressive government is capable of accomplishing wonders, both industrially and commercially. That the accomplishment of these wonders will have a very direct bearing upon all European trade interests in general in China and of British trade interests in particular cannot be overlooked. At the present time China constitutes one of our most important markets, solely because the Chinese in the past have not been able to manufacture the goods they take from us in sufficient quantities or of equal quality. Tariffs would not be wanted to protect the growing Chinese manufactures turning out these goods, and under favourable political conditions the Chinese markets would be soon supplied with all the consumers were likely to require at, in the majority of cases, prices below the cheapest imported goods. The loss of Chinese markets to European and American producers would be serious enough in itself, but if in neutral markets we had to face Chinese competition a still more serious development has to be taken into consideration. In point of cost of production, even if we confine ourselves to one factor, namely, that of operatives' wages, not only Great Britain but the cheapest civilised competitors—if we rule out India and Japan—would be hopelessly beaten. When we look a little further ahead, and find ourselves compelled to acknowledge that an arrangement between China and Japan for sea-borne goods and unmanufactured material would be inevitable, we are not in any way exaggerating yet another untoward possibility, and, in any case, to assume that China would not follow Japan as a shipbuilder would be disregarding an inevitable development on her part.

The competition Europe and America have already to face from Japan in neutral markets for manufactured goods has been possibly exaggerated from time to time, but that the competition exists and that it is steadily increasing cannot be denied. Eventually competition between China and Japan for neutral markets, from which these countries have practically ousted European and American-made goods, would be bound to occur, with results that can be best left to the imagination, although it is fairly safe to assume that we and other Western manufacturing nations would not materially benefit from such a struggle. India has, in some measure, taught us what to expect from the development of local manufacturing industries producing goods which were at one time the extremely profitable exports of our looms and factories, and China may accentuate the points in this lesson in the future. When to the possibilities of Indian development and the already acknowledged growing competition of Japan we add that of a really awakened industrial China it is not possible to consider the future of Far Eastern trade when regarded from the standpoint of the British manufacturers, in a particularly optimistic vein. Pessimism, of course, with regard to this outlook is on the presumption that matters in China will proceed according to Cocker, or rather that the

aspirations of the party working—and, incidentally, fighting—to bring about a better condition of affairs will be realised. Although it is impossible for any one to foretell or even to pretend to foretell what the outcome of the present movement may be, it is fair to assume that sooner or later the industrial awakening of China must take place, and that it may take place as the result of this political upheaval. The dismemberment of China on the lines thought possible even ten years ago, however, is extremely unlikely, and a more or less cohesive China under any Government, only slightly more progressive than that which in courtesy we may describe as the existing one, must always be reckoned a potential source of danger to all European manufacturing interests doing trade on a large scale with the Far East.

Rowland's Macassar Oil

FOR THE HAIR
Is the Best Preparation you can use.
WHY?

BECAUSE without it the Hair becomes dry, thin and brittle, and this is the nearest approach to the natural oil in the Hair, the loss of which causes baldness.
BECAUSE you must keep the Hair well moistened and not dry, or you will soon lose it.
Ladies require it to keep the Hair soft and silky.
Men require it to prevent baldness.
Children require it to lay the foundation of a luxuriant growth. Sold in a Golden Colour for Fair Hair. Of Stores, Chemists, and Grocers, 67, Hatton Garden, London. Avoid cheap spurious imitations and only buy the genuine Rowland's.
